SUMMARY

Third-year IT and Management undergraduate at the University of Moratuwa with hands-on experience building full-stack web applications using modern JavaScript frameworks and REST APIs. Experienced in developing real-world project workflows through team and individual projects. Actively seeking a software engineering internship to apply practical development skills while learning from experienced engineers.

EDUCATION

University of Moratuwa <i>BSc (Hons.) in Information Technology and Management</i> Moratuwa, Sri Lanka • CGPA: 3.53 / 4.00 (Semester 1: 3.68 · Semester 2: 3.69 · Semester 3: 3.22)	2023 – Present
J/Vembadi Girls' High School <i>GCE Advanced Level — Physical Science Stream</i> Jaffna, Sri Lanka	2020 – 2022

TECHNICAL SKILLS

Programming: JavaScript, TypeScript, Python, Java, C
Frontend: React, Next.js, Angular, Tailwind CSS
Backend: Node.js, Express.js, Spring Boot, Ballerina
Databases: MongoDB, MySQL, PostgreSQL
Cloud & DevOps: AWS, Docker, Kubernetes (Basic), Vercel
Data & ML: NumPy, Pandas, Scikit-learn, Matplotlib, Plotly
Tools & Design: Git/GitHub, VS Code, Jupyter Notebook, Figma, Adobe Photoshop
Soft Skills: Problem Solving, Analytical Thinking, Teamwork & Collaboration, Fast Learner

PROJECTS

1. Performance Management System (PMS) – Evaluation & Approval Workflow [| Git Repo](#)

Centralized web-based PMS for managing employee performance evaluations through a multi-level organizational workflow.

• Tech: Next.js, React, TypeScript, Tailwind CSS, Python Flask, REST API, Supabase PostgreSQL, Azure AD SSO, LLM APIs.

My Contribution

- Developed the Evaluation & Approval workflow, covering team management, employee evaluation, review, approval, rejection, and status tracking.
- Implemented My Team with employee search, evaluation-status filtering, and status-wise employee counts.
- Built evaluation interfaces with **performance objectives, targets, achievements, ratings, overall scores, and feedback.
- Implemented multi-level approval and rejection workflows with reason/comment handling and status updates.
- Developed Enquiry and Notification modules for evaluation disputes and workflow updates.
- Integrated frontend workflows with Flask REST APIs and Supabase PostgreSQL, with role-based access following the organizational hierarchy.

2. BlogApp – Full-Stack Web Application

[| Git Repo](#)

A full-stack blogging platform with dynamic post management, live Markdown preview, search features, and profile administration.

- Tech: Next.js, React, Node.js, Markdown Syntax Parser, RESTful APIs, Tailwind CSS.

My Contribution

Main Responsibilities: Authentication Engine, Rich-Text Editor, Post CRUD Lifecycle, User Dashboard.

- Built a secure login and session management workflow with role-based access.
- Developed a Markdown editor featuring live preview, formatting controls, and draft saving.
- Implemented full CRUD operations for post creation, inline editing, and deletion with confirmation modals.
- Engineered post discovery interfaces with real-time text search and detailed post views.
- Designed a personalized profile dashboard displaying user activity metrics and post management controls.

3. CNC Paper Board Cutting Machine – Microcontroller Project

Automated CNC machine for paper board cutting using stepper motors, servo motors, sensors, and G-code.

- Tech: ESP32, CNC Shield, NEMA 17, DRV8825, Servo Motors, TCRT5000, LCD, GRBL, Inkscape, Blender.

My Contribution

- Implemented LCD interface and servo motor control for machine operation.
- Integrated and synchronized the paper feeding mechanism with the cutting process.
- Designed 3D machine components using Blender

CERTIFICATION & CONTINUOUS LEARNING

- Completed relevant certifications and online courses in Software Development, Web Technologies, and Database Systems.
- Continuously developing skills through hands-on projects, technical courses, and emerging technologies such as AI/LLMs and modern web development

INTEREST

- Data Science & Statistical Analysis
- Artificial Intelligence, Machine Learning & Data-Driven Problem Solving
